-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

Claims 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Objections

Claim 11 is objected to because of the following informalities: in line 1 'An' should be changed to -A-. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-14,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lesar in view of Haack et al. Lesar discloses the basic meat grinder including a precutter, a perforated disk, and a centrally oriented discharge screw. Lesar does not use a series of cutters and disks which may result in unwanted product size or inefficient cutting. Haack et al solves this problem by disclosing similar apparatus including a series of knives and disks. In order to provide for efficient cutting, it would have been obvious for one of ordinary skill in the art to modify Lesar by providing a series of cutters and disks, taught to be desirable by Haack et al. The remaining limitations would then have been obvious design choices only. For example, the use of

sensors in grinding operations to control various parts of a grinding apparatus is well known in the art and of no patentable merit. Also, the use of a computer to help control a grinding operation is well known in the art and of no patentable merit.
